OVERVIEW

One of the key roles of any board is to ensure that there is the appropriate Governance, Risk Management and Leadership in place to achieve the stated aims and objectives of the organisation

This programme offers both new and more experienced board members an essential understanding of their role and how they can maximise their effectiveness. It helps directors to clarify their governance mission and fully exercise their leadership potential as a board director.

The Programme has arisen out of the recognition that there is a critical need to enhance the opportunities for learning and development of executive and non-executive directors and company secretaries (current and aspirant) in private and public companies, as well as state owned organisations.

This programme exposes participants to the latest thinking on Governance, Risk and strategic leadership, while equipping them with the necessary procedural and process skills in the increasingly difficult area of leadership and decision-making.

The programme will demonstrate how board members engage in breakthrough thinking. It covers strategic intent and core competency issues, understanding the strategic mindset, the challenge of change and how to develop a strategic change programme to realise growth objectives.

Delegates will be encouraged to consider how risk influences and is influenced by strategy, how it informs decision-making at the highest level, and how organisations can understand and manage their own appetite for risk.
